Fences

The City of Golden Valley does not require permits for fences. Fences must meet the following requirements.

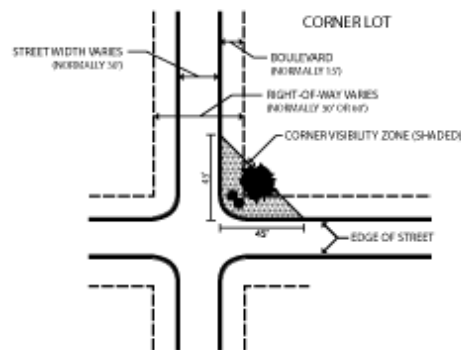

Fence Height

Fence height must be 6 feet or less in the backyard and 4 feet or less in the front yard. Exceptions to this may apply if your property line is along a busy street. Contact the Planning Department for clarification specific to your property.

Fence Location

Entire fence structure must be on the **owner's side of the property line**.

Visibility must be maintained at all street intersections. If you live on a street corner, no part of your fence can obstruct the corner visibility zone. The corner visibility zone is the area between the right-of-way lines of intersecting streets and a line joining points on such lines 45 feet distant from their point of intersection, or in the case of a rounded corner, the point of intersection of the tangents. See illustration.

Fence Appearance

All **structural supports for the fence must face inward** towards your property.
